OUR **OBJECTIVES**

- Development and provision of systems and application software for microprocessor-based information systems, offshore software development projects, internet service provision, and solutions in various application areas, including emerging niches such as internet and intranet website applications, software enterprise, resource planning, e-commerce, and value-added products.

- Importing, exporting, distributing, and dealing in software solutions for both domestic and international markets, catering to India and other regions.

- Designing and developing software systems on behalf of computer, telecom, digital, and electronic equipment manufacturers, owners, and users, both in India and worldwide.

- Conducting software development and offering IT-enabled services such as call center management, medical and legal transcription, data processing, warehousing, and database management.

- Dealing with computer software packages through import, export, sale, purchase, or other means, along with the business of computer hardware.

- Assembling data processors, programmed designs, and dealing with hardware and software packages, including tabulating machines, accounting machines, calculators, computerized telecommunication systems, networks, and their components, spare parts, equipment, and devices.

- Establishing, operating, and managing institutions, schools, and academic programs dedicated to educating individuals in computer technology.
